

Welcome to Santiago Canyon College! We are excited to have you be a part of our academic community, which strives to inspire, transform, and empower students. As a result of recent law changes under Assembly Bill 705, we are no longer using standardized placement tests to place students into English or math courses. By law, community colleges are required to use high school transcript information as well as other multiple measures to make English and Math placement recommendations.

If you would like to enroll in a transferrable English or math course and you do not have access to your high school transcripts or if you studied in another country, please complete the English and Math Guided Placement using the link below.

Guided Placement Home: <https://sccollege.edu/Departments/testing/Pages/Guided-Self-Placement.aspx>

Students interested in our **English as a Second Language (ESL)/American College English (ACE)** program:

ACE classes are focused and intensive so that students can gain fluency in English as quickly as possible. Our ACE program has **only 3 levels**, and most students take only one or two levels before moving into freshman composition. For information on the ACE Course Placement click [here](#).

Once you complete the Guided Placements, you will receive your placement recommendations within 3-5 business days (excluding weekends and holidays). We look forward to guiding you through your educational journey.
