ERGANalytics allows policy makers to respond to this critically important challenge:

“... identify those organizations whose practices contribute to high academic achievement and cost-effective operations.”

*Governor Perry and Lt. Gov. Dewhurst*

The ERG tools are designed to help organizations improve their performance by providing better information for making decisions. These tools allow administrators to answer the following questions quickly:

- How well is their organization doing?
- Where are performance improvements necessary?
- Who are their models of high performance?
- Are their improvement strategies working?
