

COURSE SLO ASSESSMENT REPORT, SCC

Department: Biology Course: Biology 239

Year: 2013 Semester: Fall

1) Outcome to be assessed	2) Means of assessment and criteria of success	3) Summary of data collected	4) Analysis of data	5) Plan of action/what to do next
<p>Identify anatomical features of the body on a microscopic and/or gross level and indicate the relative location of each.</p>	<p>One multiple-choice question will be inserted into an exam. A class average score from the correct answers will be calculated to assess overall class learning; 65% correct is expected for a passing grade.</p>	<p>Sample size of 113 students.</p> <p>A total of 72% of the students received the correct answer.</p>	<p>My benchmark for this class, for a satisfactory passing grade, is 70%. I received acceptable levels of understanding at a level of 72% correct for the class.</p>	<p>W will be using different questions next time we asses this SLO. This way we can truly see if there is any improvement by the students.</p>
