

**PROGRAM SLO ASSESSMENT REPORT, SCC**

Department: Mathematics Course: Math N48

Year: 20113 Semester: Fall - Data

1) Outcomes to be assessed	2) Means of assessment and criteria of success	3) Summary of data collected	4) Analysis of data	5) Plan of action/what to do next
1) Recognize, read and apply algebraic vocabulary and symbols.	<p>In 4 sections of N48, we evaluated scantrons using 4 questions for SLO #1.</p> <p>We hope for 70 % of students having correct answers for this SLO.</p>	<p>4 sections of N48 (out of 7) with 125 students from all these sections</p> <p>52 % correct for SLO #1.</p> <p>Looking at each section, we have a variance from 35% to 72% correct.</p> <p>see attached data</p>	SLO #1 - The vocabulary questions on the final had 52 % correct.	<p>We had only 52% correct answers to the first SLO. We see a large difference in the individual classes. I believe that this shows that there are wide differences in what individual teachers stress in their classrooms.</p> <p>The results of this assessment will be given to all N48 instructors and we will include some information on our beginning of the year material as to the importance of vocabulary and symbols.</p>
