

COURSE SLO ASSESSMENT REPORT, SCC

Department: Water Utility Science Course: 210

Year: 2012 Semester: Fall 2012

1) Outcome to be assessed	2) Means of assessment and criteria of success	3) Summary of data collected	4) Analysis of data	5) Plan of action/what to do next
Upon completion of Water 210, students will be able to identify the complexities of water production and system management.	Assessment was conducted by a comprehensive Final exam. A 70% score on the final exam is considered a "C" grade and considered a successful outcome.	26 Students sat for the Final Exam The average score was 84%. 22 of the 26 (85%) students scored better than 70% on the Final Exam.	The Final Exam results demonstrated that the vast majority of the students successfully absorbed and retained the class material.	The goal for the WUS210 class each semester is to achieve a 100% success rate. In an effort to achieve that goal students will be encouraged to invest more time on study of the class material outside of class as well as to take advantage of one on one assistance offered by the instructor prior to each class session.
