

Update on AB 1805 Implementation and Data
Presented by Maureen Roe at the English Department Meeting
April 29, 2020

District Research was tasked to create the methodology and platform that will be used to post our placement results for AB 1805 compliance. Tyler Nguyen, researcher from the District Office, compiled data from Fall 2019 to help validate AB705 with placement information and success rates. He reviewed this information at the February AB705/BSI Task Force Meeting. SAC was presented this information during the March Student Success and Equity Committee meeting. To be in compliance with AB 1805, we need to have this data publicly available on our website. There is a question about whether AB1805 requires **publishing success rates or only placement methods**. The language suggests the latter, so we may remove the success rates from the website.

Based on Fall 2019 numbers of those taking English classes, most first-time students (1053/1450) were placed by CCCApply (their self-reported high school GPA), and their success rate in a transfer-level class (English 100 or English 101) was 64.8%.

SACs numbers are 2032/2811 placed by CCCApply with a success rate of 50.5% (in their English 101 and 101 with support, 066).

Placement from high school transcripts has a higher success rate than placement by counselor waiver. Although success rates for both math and English were lower than we would like, by

granting more students access to transfer-level classes, **we are increasing the likelihood that students will complete a transfer-level course within one year.**

Here are the dashboards Tyler created for SAC and SCC. We are encouraged to look at these dashboards as they present a picture of how our students are performing at each level. **It also gives us the opportunity to reflect on what is working and what are some areas we need to improve upon.**
