### NOTES:

~Data is presented raw with no adjustments

For both charts, where the band gets narrower, there is a decrease and where the band gets thicker, there is an increase in FTES for each course type. The vertical axis has been adjusted so that it starts at 4,000 FTES. This allows us to zoom in and get a better idea of the difference.

**From 0 to 4,000 on the chart is all WSCH.**
